

1. Find all products with price greater than 500
`db.products.find({ price: { $gt: 500 } })`
2. Get all products in "Accessories" category with stock greater than 50
`db.products.find({ category: "Accessories", stock: { $gt: 50 } })`
3. Find products where RAM is 8GB
`db.products.find({ RAM: "8GB" })`
4. Get products that have the tag "gaming"
`db.products.find({ tags: "gaming" })`
5. Sort all products by price in descending order
`db.products.find().sort({ price: -1 })`
6. Get top 5 cheapest products
`db.products.find().sort({ price: 1 }).limit(5)`
7. Count the number of products in "Phones" category
`db.products.countDocuments({ category: "Phones" })`
8. Find products with stock between 20 and 100
`db.products.find({ stock: { $gte: 20, $lte: 100 } })`
9. Get only name and price of all products (exclude _id)
`db.products.find({}, { _id: 0, name: 1, price: 1 })`
10. Find products where price > 500 AND category is "Laptops"
`db.products.find({ price: { $gt: 500 }, category: "Laptops" })`
11. Find products where price is between 100 and 500
`db.products.find({ price: { $gte: 100, $lte: 500 } })`
12. Get products where category is NOT "Accessories"
`db.products.find({ category: { $ne: "Accessories" } })`
13. Find products with stock less than 20
`db.products.find({ stock: { $lt: 20 } })`
14. Get products that have BOTH "gaming" and "office" tags
`db.products.find({ tags: { $all: ["gaming", "office"] } })`
15. Find products where storage is greater than or equal to 512
`db.products.find({ storage: { $gte: 512 } })`
16. Get total stock of all products
`db.products.aggregate([ { $group: { _id: null, totalStock: { $sum:`

```
"$stock" } } ]])
```

17. Find the highest priced product

```
db.products.find().sort({ price: -1 }).limit(1)
```

18. Find products whose name contains "Phone"

```
db.products.find({ name: { $regex: "Phone", $options: "i" } })
```

19. Get count of products in each category along with average price

```
db.products.aggregate([ { $group: { _id: "$category", count: { $sum: 1 }, avgPrice: { $avg: "$price" } } } ]])
```

20. Find products with stock > 50 and price < 200

```
db.products.find({ stock: { $gt: 50 }, price: { $lt: 200 } })
```
